Manufacturing Jobs

**\$21.1bn**

Announced  
Manufacturing  
Investment

**173.8 GW**

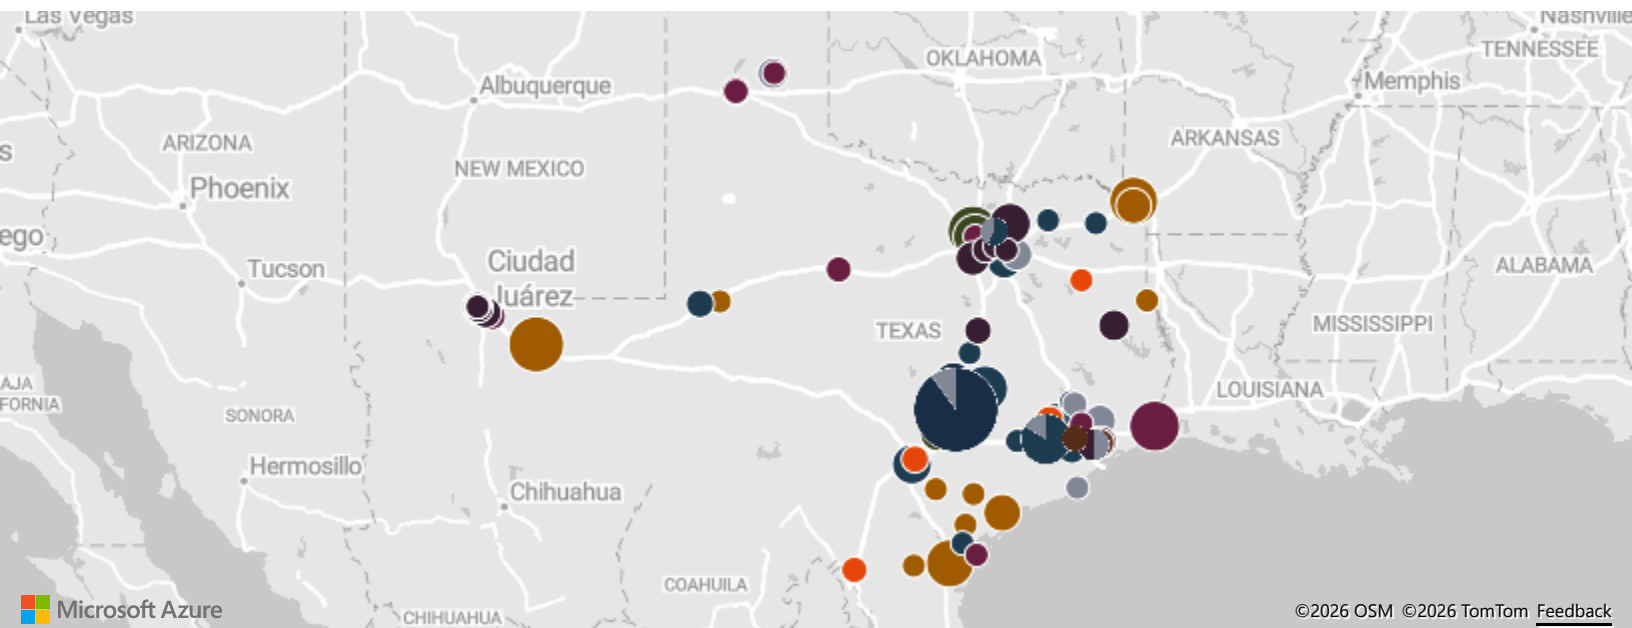

Operating & Planned  
Clean Power Capacity

**59%**

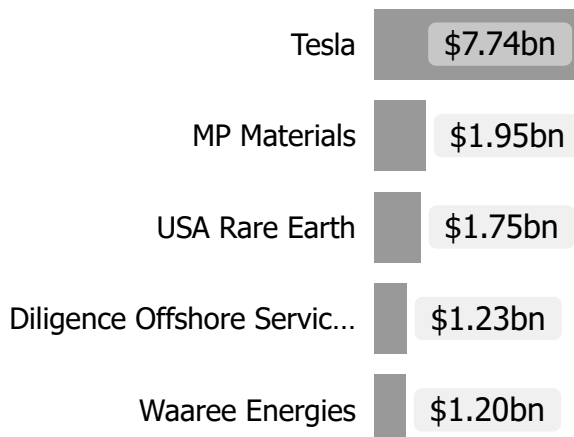

Operating and  
Planned Capacity  
that's Clean

## Manufacturing Facility Locations

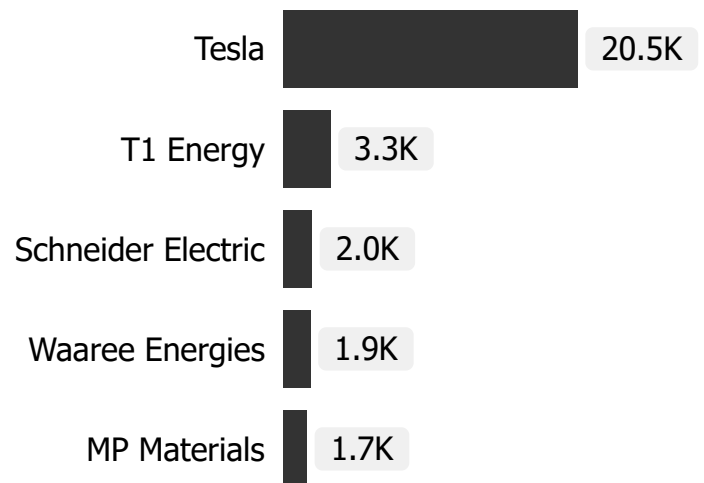

● Electric Vehicles ● Minerals ● Solar ● Magnets ● Batteries ● Wind ● Grid ● Heat Pumps ● Hydrogen

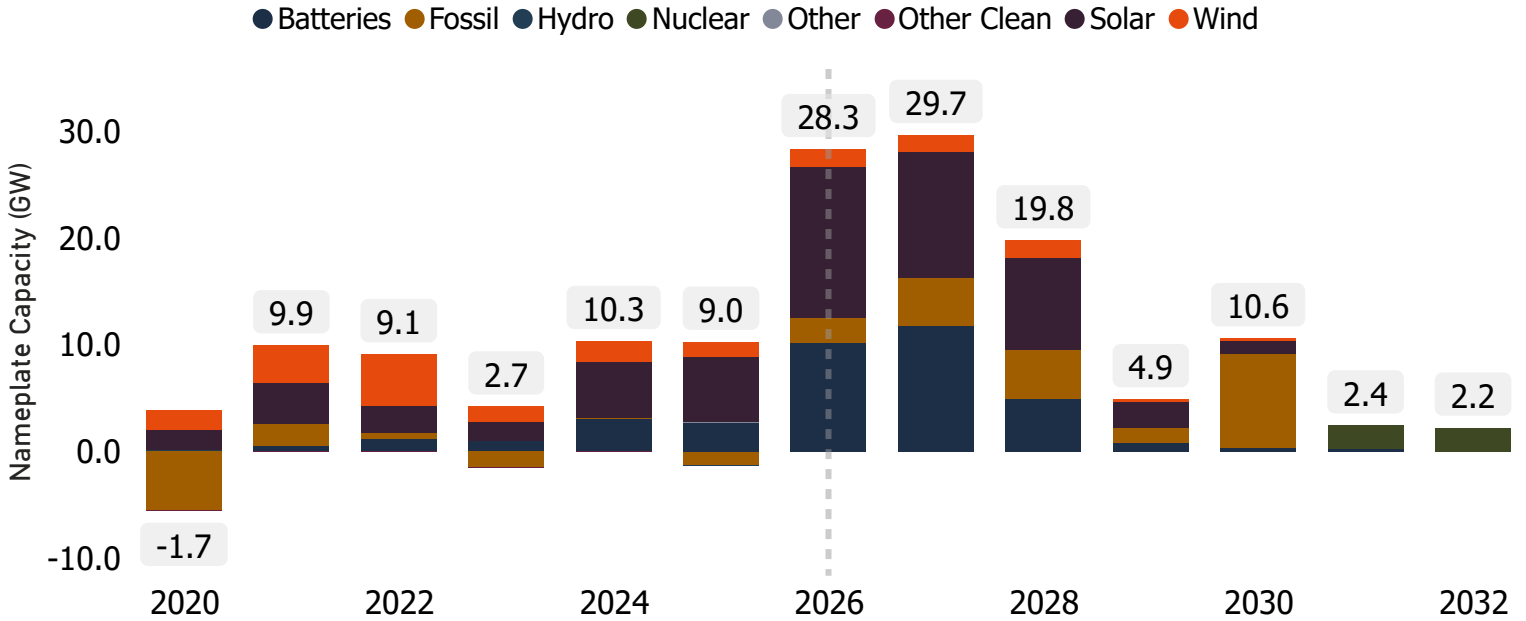

## Top Companies by Investment in Texas

## Top Companies by Jobs in Texas

## Power Capacity Since 2020

## Top 5 Congressional Districts in Texas\*\*

Congressional District	Announced Manufacturing Investment	Announced Manufacturing Jobs	Congressional District	Operating Clean Power Capacity (GW)	Planned Clean Power Capacity (GW)
TX35	\$6.5 billion	4,544	TX19	19.12	9.45
TX10	\$1.8 billion	3,862	TX23	11.29	4.81
TX23	\$1.8 billion	0	TX13	11.02	6.64
TX27	\$1.3 billion	352	TX11	7.57	3.69
TX04	\$1.3 billion	150	TX22	7.34	4.39

\*\* Top districts as measured by announced manufacturing investment and operating clean power capacity

## American Energy Stories from Texas

India's top solar panel maker Waaree Energies announced in December 2023 that it would invest up to \$1 billion to build a factory in Texas to take advantage of soaring U.S. demand for clean energy. Waaree said that by 2027 its planned Brookshire, Texas facility will be one of the largest solar factories in the U.S., with an annual capacity of 3 gigawatts (GW) of panels when it opens in late 2024, then expanding to 5 GW. The Houston-area factory will create more than 1,500 jobs.

Sunscape Renewable Energy is a proposed 500-megawatt solar and 500-megawatt Battery Energy Storage System (BESS) project on up to 3,600 acres of privately owned land in Nueces County, Texas. This project could be operational as soon as the end of 2026 with the potential to provide taxpayers, school districts, hospitals, and the local government with reliable economic benefits for years to come.
